Hiring Team & Engineering Leadership
Anthropic Labs Partner
Bengaluru, Karnataka, India

APPLICATION FOR LEAD AI PLATFORM / AGENTIC WORKFLOWS ENGINEER

Dear Hiring Team at Anthropic Labs Partner,

I am writing to express my strong enthusiasm for the Lead AI Platform / Agentic Workflows Engineer position at Anthropic Labs Partner. With over 6 years engineering autonomous agentic pipelines, high-throughput microservices, and LLMOps evaluation architectures, I am eager to apply my experience directly to your engineering team.

Lead AI & Agentic Workflows Architect with 6+ years designing scalable autonomous agent systems, Playwright CDP automation, and LLMOps evaluation pipelines.

Throughout my career, I have prioritized high-ownership engineering with measurable production outcomes:

- **42% ticket deflection, $180k savings:** Architected multi-agent customer support automation platform using Playwright CDP and Gemini 1.5, deflecting 42% of manual tier-1 tickets and saving $180k/year in operational overhead.
- **2.5M docs, 120ms retrieval:** Engineered real-time document extraction and RAG pipeline indexing 2.5M enterprise contracts with sub-120ms vector retrieval latency.

In this role, I look forward to owning the end-to-end reliability of Anthropic Labs Partner's systems, architecting resilient automation that scales smoothly under load while enforcing strict quality benchmarks.

I would welcome the opportunity to discuss how my hands-on background can contribute to Anthropic Labs Partner's mission. Thank you for your time and consideration.

Sincerely,

Arjun Sharma
